

Choosing the best area rugs

Decorating your home with rugs

To create warmth in any room in your home, you will find a great selection of rugs that will make sure you not only keep warm and cozy in winter but that during summer you have better insulation and pretty floors. You get children's rugs, kitchen rugs, bathrooms rugs, large area rugs, and then you also get the fabulous Persian rugs. For any of these rugs you will need to decide on the style and color you want and also the shape, as you get rectangular, round, square and oval shaped rugs.

For any room in your home, you will find that rugs add a lovely texture and quality and may spice up any boring wood floor or ugly carpet. You can also create a more fantasy, fun look in a child's room with cartoon character children's rugs or the more educational ones. Some children's rugs also act as a race track for toy cars. In the kitchen rugs department you can get various patterns and images that will enhance the décor of your kitchen and you can get coffee shop effects and cookery images to make your kitchen more inviting and warm.

With area rugs you will have to find something that withstands heavy traffic and that also fits in with the décor of your room. You can opt for plain colors or Persian rugs which offer intricate patterns and are of very high quality. Certain Persian rugs can also make statements by just being hung on the walls as a tapestry. This looks great in a medieval, Indian and Persian themed room.

Bathroom rugs are very necessary to make your bathroom warm and also to step onto when you get out of the bath or shower. You do get bathroom mats and sets with covers for the toilet seat and mats for under the toilet or basin, but if you want a more classic or eclectic feel for your bathroom, you can also put bathroom rugs into your space. Just be sure that they are not slippery and if they don't have a rubber backing, invest in some rubber under mats.

With any of the bathroom rugs, children's rugs, kitchen rugs, and area rugs, you will find that the quality of them is very important for use inside a home. If you are placing a rug on the wall for décor purposes a Persian rug will be great because it will not get things spilt on it although the quality will definitely be good enough to sustain heavy traffic from people, pets and against spills. For other kinds of rugs, you must make sure that the quality of weave is strong and durable and that it can be washed as many kitchen and bathroom rugs will need it once in a while. For children's rugs which need to be washed fairly often, you must ensure that you get a very good quality rug and if you are worried about it getting ruined too quickly still, get 2 or 3 cheap rugs that you can alternate.
